

## Music Creation Websites

If you are able to use the internet on a computer or other device, check out these websites for music creation:

Chrome Music Lab: <https://musiclab.chromeexperiments.com/>

Song Maker, Melody Maker, Kandinsky, and Rhythm Maker all allow the user to use their creativity and create unique sounds!

Incredibox (free version, no need to download the app for \$)

[www.incredibox.com](http://www.incredibox.com)

Click “Try Web Version”, choose one of the icons (we like “The Love”), then drag the icons below the figures onto the figures and create unique music! You can even record and save your mix to share with family and friends through email!

Happy Music Making!
