

Wearing A Mask

These social stories about wearing a mask and social distancing were created were created for use by ALL our PEP classrooms.

Print the stories as two separate books or together. You may choose to laminate and bind the book, or you may choose to staple the pages together.

There is also a TEXT ONLY version at the end if you prefer just to use the social script, more appropriate for our Highschool classrooms.

Both books are very basic on both topics. This was done intentionally. You may supplement these books with more in-depth conversations and activities appropriate for your class.

As with all social stories, plan an appropriate time to read the book with your students, answer their questions, model the correct use of a mask and social distancing. Have your students demonstrate the proper way to wear a mask and to social distance. Read the books each day as part of your new classroom routines.

Thank you,

PEP Autism Collaborative

Wearing My Mask

Wearing a mask is a tool we can all use to protect ourselves and others from COVID-19.

We are ALL expected to wear masks at school.

Wearing a mask helps protect me, my friends, my teachers, my cab driver, and EVERYONE I come into contact with from COVID-19.

It is my social responsibility to wear a mask all day at school.

The proper way to wear my mask is for it to cover my nose, mouth, and chin.

I will put my mask on at home before I get into my cab/on the bus.

I will wear my mask in the cab/on the bus.

I will wear my mask while walking from my cab to my building.

I will wear my mask on the stairs and in the hallways.

I will wear my mask in my classroom.

I will wear my mask all day.

I may take my mask off to eat breakfast and lunch and when getting something to drink.
After I eat and drink, I will wash my hands and put my mask back on.

It is important to wear my mask all day to protect myself and others from COVID-19.

Don't forget your mask!

Wearing a mask is a tool we can all use to protect ourselves and others from COVID-19.
