

## Acknowledgement of Childcare Consultation Services

Our center is committed to providing quality services to our children and families. As you are aware, we have been working with an outside consultant in your child's classroom.

This consultation may include both in-person and video sessions.

The purpose of the in-person and video sessions may include the following:

- a. Visual observation of your child's behaviors
- b. Visual observation of the classroom environment
- c. Communication between the classroom consultant, childcare staff, parent, and others on the team
- d. Modeling of strategies for teachers, staff, and parents

**No recording of video sessions will take place. The parent may refuse video sessions at any time.**

Should you have any questions regarding in-person or video sessions or the Childcare Classroom Consultation Program, please contact:

I have read the above ***Acknowledgement of Childcare Consultation Services***. I understand that I may refuse in-person and/or video sessions at any time.
